

Ember

Training Stage 1- 13 Yrs Old

Background:

Our dear Ember, has had a very long history of abuse. She doesn't trust humans except for our trainer at AHRE. Here she has found some peace.

Challenges:

Ember will be with Arabian Horse Rescue & Education for the foreseeable future as she recovers from past mistreatment and learns to find safety, compassion and care with people. Ember also suffers from ring bone, a flaring form of arthritis. It causes an incredible burning sensation when it flares up. Then the bone fuses. After a while, it flares again. There is no treatment except for pain management.

Due to her significant fear of everything and her medical condition. The Board of Directors have decided that she will remain with us, in the only place she has felt safe.

Together, we extend our human love and compassion. Ember needs sponsors to support her.

Please sponsor Ember today.
